

The following list of apps can be used to help develop visual skills necessary for learning and success in the classroom. Most are appropriate for use on the iPad, but some have versions available for iPhone and iTouch. Apps are appropriate for all ages and free unless noted with (\$). Many paid apps have free versions so you can try the app before purchasing the full version.

Important: This is NOT a replacement for an eye examination or any recommended therapy program. Please consult with your optometrist and/or therapist before including this in your therapy program.
