REASONS PATIENTS PURCHASE THEIR EYEWEAR FROM ENVISION

As qualified professionals, our job is to ensure that you receive a detailed consultation when choosing your new eyewear. Your visual demands and lifestyle choices, combined with our experience and knowledge, provide you with the necessary guidelines when considering which frame is best suited for your prescription. Your visual performance will be enhanced with the new technology and your experience will be unsurpassed with service from our team of certified and licensed professionals who believe that attention to detail is of utmost importance.

PERSONALIZED FRAME FITTING

A qualified dispenser will assess the complete fit of the frame.

This will include:

- Proper temple length. Improper length will affect the comfort and aesthetics of the frame.
- Fit of the bridge piece or nose pads to optimize comfort and aesthetics.
- Correct pantoscopic angle of the frame (forward frame angle) to maximize optical performance.
- Proper frame alignment with the patient's pupils which will enhance the visual comfort, aesthetics and performance of the lenses.
- Accurately assessed frame measurements to ensure the frame is properly proportioned to the eyes and face shape.

ACCURATE LENS SELECTION

Not every lens is created equal! There are many options for every prescription. Whether you are wearing distance-only lenses, readers, or a specialized bifocal, progressive or office lens, there are multiple factors that must be considered in order to produce optimal visual performance.

These will include:

- Height and posture
- Occupational, physical and leisure visual demands
- Frame choice that best accommodates the lens edge thickness

EXCELLENT POST CARE

Our office offers free adjustments to any pair of glasses purchased, as well as free nose pads and temple covers. Most of our frames are covered by a two-year manufacturer's warranty. We have fully-qualified Licensed Opticians on staff to answer any questions or concerns related to your glasses and/or vision demands. Dr. Loose is also available for further consultation at no additional charge.
